NOTES:
Depth contours are in metres.
Heights shown in brackets are in metres above mean high water.
Grid datum is the Geocentric Datum of Australia - 1994,
which is approximately equivalent to WGS-84.

The Waterways Authority of New South Wales has taken every care to ensure that the information shown on this map is correct as of July 2001. However, the map is not intended for navigation purposes, and the Authority takes no responsibility for any error, misdescription, or omission in respect to any matter therein. Copyright Waterways Authority.

The local office of the Authority is situated at: Office 3, 35 Beach Street, Merimbula NSW 2548. Telephone: 6495 1816.

The Boating (Safety Equipment) Regulation NSW, requires that when vessels are on open waters, that is out from the coast, they must carry an appropriate map or chart.
In the interests of safe boating, this map is deemed to be an appropriate map for use by recreational vessels undertaking voyages less than 3 nautical miles off the coast and within a radius of 15 nautical miles of their point of departure from the coast.
Vessels undertaking longer voyages than that stated above **MUST** carry an appropriate chart, which is an Admiralty or Australian Hydrographic Chart showing the area proposed for the vessels voyage or excursion.
It is the responsibility of the user to ensure that they are in the possession of the latest map. When using this map on unfamiliar waters, check with the Waterways Authority to determine if it is the latest issued.

IN CASE OF AN EMERGENCY
